

Role Title – Information Security Analyst

Location - Nottingham

Do you have experience in Information Security or a transferable IT role? Are you looking to utilise your skills and experience in a progressive organisation? We have a brand new opportunity in our evolving Information Security Risk function to join The Nottingham as an Information Security Analyst.

You will be monitoring Information Security, protecting the confidentiality, integrity and availability of customer and corporate information, guarding against the risks of misuse or loss of business critical information and the consequential threats to the Society's credibility, financial stature or ongoing business activities.

You'll have excellent written and verbal communication skills and proven experience in a transferable role. You'll be highly motivated with a desire to learn and develop in a changing environment.

The Nottingham, who are we? We are *Accountable, Relevant, Respectful, Open, we Work Together* and we *Support our Communities*, these values form the foundations of our culture.

Your contribution:

- Monitor and enforce compliance with the I.T. Security policies, standards and procedures based around ISO 27001
- Maintain IT Security procedures
- Provide effective and timely response to operational incidents and work requests raised by users throughout the Society
- Assist other departments to define build/application deployment standards for the society
- Keep abreast of developments in best practice which could benefit the Society
- Support the objective to drive continuous improvements for the role and department

Your expertise:

- Technical knowledge of server and network based computing and communications technologies
- Excellent written and verbal communication skills
- Excellent analytical skills
- Experience working in an Information Technology environment
- Hold or be working towards IT Infrastructure Library (ITIL) foundation certificate & CISSP (Certified Information Security Systems Professional)
