

Role Title – Information Security Specialist

Location – Nottingham

Here at The Nottingham we are heavily investing in our IT and Change department and are amidst a key and exciting time with a large change agenda. We are currently recruiting for an Information Security Specialist to join our IT Security team. Reporting directly to the Information Security Manager, you will be part of a team who is responsible for protecting, controlling, handling and removing data for the whole of The Nottingham.

This is a dynamic role in which no two days are the same; it strikes the right balance between process and supporting the wider team with a variety of projects. You will have the opportunity to mould policies and procedures and will enjoy a high degree of autonomy and flexibility within your role to achieve this. In a nutshell you will be influential in the inclusion of new technology to safeguard The Nottingham.

The Nottingham, who are we? We are *Accountable, Relevant, Respectful, Open, we Work Together* and we *Support our Communities*, these values form the foundations of our *Doing The Right Thing* culture.

Your contribution:

- Running checks for Internal Audit to ensure data is held correctly and securely
- Improving existing security controls
- Inspecting security controls: system hardening and standard imaging
- Ensuring that security risks are controlled with vulnerability scanning and optional penetration testing
- Assist in projects, consulting on security practices which are the best fit for The Nottingham
- Handle security incidents and breaches in line with The Nottingham's policies and procedures
- Work as part of a collaborative team

Your expertise:

- An understanding of IT Security practice
- Working towards CISSP or equivalent
- Knowledge and experience of ISO 27001/2
- Previous experience with risk assessments
- A confident communicator with an ability to communicate to stakeholders at all levels and areas of the business

We are looking for someone who is naturally inquisitive with an eye for improving existing processes. You will naturally have the desire to produce good quality, well documented and accurate work and able to perform in fast paced environment.
