

Role Title – Release and Environment Manager**Location – Nottingham, Head Office**

Do you have previous experience as a Release and Environment Manager? We are looking for a new member to join our team, who wants to apply the breadth of their experience to help us deliver our transformative Salesforce programme and increasing IT Change project agenda.

You'll be fully accountable for the processes, management practices and co-ordination of all releases in respect of all pre-production environments to support the organisations ongoing cycle of project and small change delivery. With core strengths in collaboration, you'll be excited to work with our IT application development and infrastructure teams, as well as our external 3rd party delivery partners.

With responsibility for maintaining holistic oversight of the overall pre-production environment estate, you'll ensure regular refresh activities are scheduled as production change occurs, defining, establishing and evolving the practices and policies for release and environment management within the organisation.

This is a superb time to join us – we are an ambitious company who are growing and looking to leverage industry leading technology, such as Salesforce, to move the organisation forward. This is a huge opportunity for you to use your previous experience to help shape our development capability at The Nottingham.

Your contribution:

- Process and practice definition for environment management and software deployment
- Provision of pre-production environments to support the ongoing cycle of project and small change delivery
- Ensure test data is available to support test execution phases of change delivery
- Management oversight of deployment of change into pre-production environments
- Continuous improvement of known environment
- Work closely with relevant parties to ensure effective management of department costs with respect to licenses required to maintain pre-production environment estate

Your expertise:

- Performed effectively in a similar role previously, ideally within a regulated industry
- Have knowledge of current best practices and processes relevant to release and environment management across Waterfall, and ideally Agile, project delivery
- Experience of managing a multi-environment estate, comprising of in-house, 3rd party developed and COTS products; hosted across on premise, managed service and cloud instances
- Knowledge of software deployment and configuration practices and technologies e.g. bitbucket, GIT, ANT, Jenkins

Please note that if your application is successful with The Nottingham you will be required to undergo background checks. All offers of employment are conditional on receipt of 3 years references and a satisfactory Financial and criminal records check.
